Income Generation from U.S. Government Securities

High-Quality Securities

The Fund is comprised of primarily U.S. government securities — considered to be among the most secure investments available.

Disciplined Approach

The management team follows an investment process that incorporates active duration management, yield curve positioning, and sector and security selection.

Experience

David Brownlee has been with Sentinel since 1993 and offers investors 29 years of investment experience.

Performance (as of June 30, 2010)

	Class A shares ³		Class C shares ⁴		Class I shares ⁵	Barclays Capital U.S. Govt Bond Index ⁶	Barclays Capital U.S. MBS Index ⁷
	Without Sales Charge	With Max Sales Charge	Without Sales Charge	With Max Sales Charge	Without Sales Charge		
Cumulative YTD	6.39%	2.15%	6.03%	5.03%	6.51%	5.40%	4.46%

Growth of a \$10,000 Investment (Class A shares without sales charge)

June 30, 2000 - June 30, 2010

The graph is for illustrative purposes only and reflects the hypothetical growth of a \$10,000 investment with all distributions reinvested. Past performance does not predict future results. Performance shown in the graph and calendar year total returns reflects expenses and management fees, but does not reflect sales charges. If performance had included the appropriate sales charge, returns would be lower.

Calendar-Year Total Returns

	2000	2001	2002	2003	2004	2005	2006	2007	2008	2009
Class A at NAV	12.58%	6.94%	10.57%	2.91%	4.69%	2.27%	4.25%	7.68%	7.09%	5.20%
Barclays Capital U.S. Govt Bond Index ⁶	13.24	7.23	11.50	2.36	3.48	2.65	3.48	8.66	12.39	-2.20

Important Disclosure

Data shown is historical performance for each share class and reflects reinvested distributions. With Max Sales Charge performance data includes the maximum 4% sales charge for Class A shares and the 1% CDSC for Class C shares. Class I shares do not impose a sales charge. Only eligible investors may purchase Class I shares, as described in the Prospectus. Investment return and principal value will vary so that you may have a gain or loss when you sell shares. Past performance does not guarantee future results; current performance may be higher or lower than data quoted. The Fund is subject to interest rate risk. Bond values will generally decrease when interest rates rise and will generally increase when interest rates fall. Mortgage-backed securities (MBS) are subject to pre-payment risk. Fund shares are not insured or guaranteed by the U.S. government or its agencies. For performance current to the most recent month-end, visit www.sentinelinvestments.com.

- The following are total annual operating expense ratios for Sentinel Government Securities Fund Class A, C, & I shares: A - 0.91%, C - 1.71%, I - 0.63%. All expense ratio data is sourced from the prospectus dated March 30, 2010.
- The Morningstar style box provides a graphical representation of the investment style of stocks and mutual funds.
 - Morningstar ratings reflect historical risk-adjusted performance as of June 30, 2010 and are subject to change every month. Ratings are based on a risk-adjusted return measure that accounts for variations in monthly performance (including the effects of sales charges, loads and redemption fees) emphasizing downward variations and rewarding consistent performance. Ten percent of the funds in a category receive five stars, 22.5% four stars, 35% three stars, 22.5% two stars and 10% one star. The Overall Rating reflects a weighted average of a fund's 3-, 5- and 10-year (if applicable) risk adjusted performance. Morningstar Load-Waived Ratings supplement Morningstar Ratings for Class A shares by recalculating measures that are load-adjusted without the effects of the front-end sales charge. Load Waived ratings should only be considered by investors who are not subject to the Fund's front-end sales charge.
 - Class A share returns prior to June 1, 2006 but after April 10, 2005 have been restated to reflect the increase in the maximum sales charge from 2% to 4%. Prior to April 11, 2005, the Fund's maximum Class A sales charge had been 4%.
 - Performance for Class C shares prior to 6/1/06 is based on the performance of the Class A shares adjusted to reflect that Class C shares do not charge a front-end sales load but may be subject to a contingent deferred sales load and adjusted for estimated higher expenses of the Class C shares. The "since inception" performance data for Class C shares is calculated from 9/2/86, which was the inception date of the Fund.
 - Performance of the Class I shares prior to their inception on 5/4/07 is based on the performance of the Fund's Class A shares, restated to reflect that Class I shares are not subject to a sales charge. The "since inception" performance data for Class I shares is calculated from 9/2/86, which was the inception date of the Fund.
 - The Barclays Capital U.S. Government Bond Index is an unmanaged index comprising U.S. government and government agency securities with maturities of one year or longer. An investment cannot be made directly in an index.
 - The Barclays Capital U.S. Mortgage Backed Securities (MBS) Index is an unmanaged index of agency mortgage-backed pass-through securities issued by Government National Mortgage Association (GNMA), Federal National Mortgage Association (FNMA), and Federal Home Loan Mortgage Corporation (FHLMC). An investment cannot be made directly in an index.

Objective

Seeks high current income while seeking to control risk by investing mainly in U.S. government bonds. Sentinel chooses the types of U.S. government securities it believes will provide the best return with the least risk at the time of investment.

Important Disclosure

All data as of June 30, 2010 unless otherwise noted. The composition of the Fund's holdings is subject to change.

- Total net assets of all share classes.
 - Expense ratio before custodian credits and reimbursements. Source: Prospectus dated March 30, 2010.
 - Total annual turnover quoted from November 30, 2009 annual report.
 - Alpha measures the difference between a fund's actual returns and its expected performance, given its level of risk (as measured by beta).
 - Benchmark index used is Barclays Capital U.S. Govt Bond Index.
 - Beta is a measure of a fund's sensitivity to market movements. A portfolio with a beta greater than 1 is more volatile than the market, and a portfolio with a beta less than 1 is less volatile than the market.
 - Standard deviation is a statistical measure of the volatility of the fund's returns.
 - Sharpe ratio uses standard deviation and excess return to determine reward per unit of risk.
 - R-squared measures the degree to which a fund's behavior is related to an external benchmark index.
